

Press release

Dania Plast A/S takes over KSK Aqua ApS

Dania Plast A/S is pleased to announce that we are taking over the activities of KSK Aqua ApS as of 15, January, 2024. In the future the bio-media 'Saddle Chips' will be marketed and sold by Dania Plast A/S together with our existing bio-media 'RK Bioelements'.

In connection with the takeover, it has been agreed that KSK Aqua's CEO, Kristian Skjerna Knudsen, will help with the handover in the first quarter, after which he will stop as of 31, March, 2024. Robert Knudsen will continue as a part-time consultant for a minimum of 12 months, where his role will be to ensure the transfer of customer relationships and cooperation agreements in the best possible way.

The production of 'Saddle Chips' will be moved as soon as possible to Dania Plast's production in the Skive department, where RK Bioelements are already produced.

About Dania Plast:

Dania Plast is an injection molding company with nearly 40 years of experience in consultancy, development and production. We have 3 business areas, which are clean room production, subcontractor for customers in several different industries, as well as production of bio media for the global aquaculture industry.

We have 55 employees spread over two production units in Skive and Mariager respectively and have a total of approximately 70 injection molding machines. The head office is located in Skive.

Statement from CEO of KSK Aqua, Kristian Skjerna Knudsen:

"I am happy that Saddle Chips will become part of the range at Dania Plast, as Saddle Chips and RK Bioelements complement each other very well. Dania Plast has the opportunity to develop and market Saddle Chips going forward in an increasingly global world. I look forward to a good collaboration with the transfer of Saddle Chips to Dania Plast"

Statement from the CEO of Dania Plast, Tommy Bonnerup:

"We are very excited to have 'Saddle Chips' as part of our product range, as it complements our current 'RK Bioelements' very well. I thank Kristian Skjerna Knudsen for the good dialogue in connection with the takeover, and I look forward to working with both Kristian in the short term - and Robert in the longer term"
